

# TRANSITION EDUCATION

**"Education is not about filling a bucket,  
but lighting a fire"**

- W.B. Yeats

***The Transition Plymouth "Education Group" explores new and open approaches to the learning process about transition issues. We believe education is about personal & social transformation. It doesn't need to be a 'one way' process, but a space where individuals can connect with one another while gaining new information to see things differently.***

***We address issues like community resilience in Plymouth, the end of cheap oil and sustainability, through workshops, info events, discussions and games. Education can happen in many ways! And it's enriching when we learn together.***

## **How to get involved?**

***As with the rest of Transition Plymouth groups, we are all volunteers. We meet regularly, take decisions by consensus and anyone who has an interest in this area of Transition is very welcome to join us! You can participate in events we are already organizing and/or we would love to hear your own ideas about an educational project, game or workshop. Just get in touch!***
